DESKTOP KIOSK

Smart Kiosk

Services in one touch

Empowering Businesses with Smart IT Solutions

A public touchscreen for everyday tasks. Printing, health checks, phone charging, astrology, nearby fuel, and local contacts — each one a short visit, with no training required.

WHAT YOU CAN DO

01
Print
Scan a QR code and upload from any phone browser, with no app required. Or enter the OTP from the Smart Kiosk app, preview the pages, and collect them from the printer.

The screen shows the page count before you confirm, in black and white or colour.

02
DigiLocker Print
Sign in to DigiLocker on the kiosk and choose the government documents you need. Preview each file, then print the ones you want.

You check the document on screen first, then collect the pages from the printer.

03
Well Being
Check blood oxygen and heart rate with a short fingertip reading, or take a body temperature. Results appear on the screen in a few moments.

The kiosk guides each step, and you can try again if the sensor is not ready.

04
Phone Charging
Watch a short sponsored message, then plug in your phone. The screen follows the session until you finish and return to the menu.

You can cancel while the message is playing or while the phone is connecting.

05
Astrology
Open a birth chart in North or South Indian style, or photograph a palm for insights. You can also match two charts or see today's panchang.

Birth details are entered on the kiosk. Nothing needs to be installed on your phone.

06
Fuel stations
Find petrol, diesel, CNG, and EV stations nearby, and filter by fuel type. Open a map, then scan a QR code to continue directions on your phone.

Distance and a rough drive time help you choose the nearest stop.

07 · LOCAL SERVICES

Find a person for an everyday job

Pick a trade on the kiosk. Each listing shows the name, phone number, and where that person works.

STEP 1
Choose a trade
Ten kinds of everyday help, from repairs to tailoring.

STEP 2
See who can help
The screen shows a name, a phone number, and a location.

STEP 3
Call from your phone
Take the number with you and contact them directly.

- AC, RO and washing machines
- Two-wheeler mechanics
- Carpenters
- Electricians
- Painters
- Tailors
- Scrap dealers
- Gas-stove repair
- Pigeon netting
- Puncture repair

BUILT FOR PUBLIC USE

The same screen stays simple for every visitor who walks up to it.

Home
Tap Home when you are done. The next person starts with a clear screen.

Still there?
If the kiosk sits idle, a short countdown returns it to the menu.

At a glance
The home screen shows the time and local weather while you choose a service.

Out of paper
If the printer runs out of paper, printing pauses with a plain message.
